FOR EMERGENCIES CALL 9-1-1 IN ALL AREAS

FOR NON-EMERGENCY INFORMATION IN LOUISIANA, CALL 2-1-1

Learn more by visiting us on line:
crescentcare.org

**Home Readiness**
- Close blinds, drapes, interior doors
- Close/lock hurricane shutters
- Board windows with plywood
- Remove items from fridge/freezer
- Unplug electrical appliances
- Turn off gas, if accessible
- Move electrical equipment/personal mementos to higher ground in a flood/water resistant container
- Take photos of property & contents
- Secure outdoor furniture/equipment

**Personal ‘Go Bag’**
- Clothes (2-3 days worth per person)
- Tooth brush/toothpaste
- Tire/brake, soap, razor
- Family pictures
- Jewelry
- Shoes
- Hair supplies (comb & brush)
- Rain gear
- Cell phone and charger

**Vehicle Readiness**
- Fuel up car 2-3 before oil change
- Check tire pressure
- Get Contra-Flow map/road map(s)
- Insurance documents

**Non-essential Essentials**
- Inflatable bed & pump
- Blankets/pillows
- CD player/CDs, DVDs, iPod
- Computer
- Portable video game
- Books/puzzle books

**Checklist**

- EVACUATION
  - Home Readiness
  - Personal ‘Go Bag’
  - Vehicle Readiness
  - Non-essential Essentials
When authorities announce a hurricane watch or warning, take these basic steps to prepare for the storm:

1. **PREPARE FOR YOURSELF**
   a. Expect – and prepare for – the need to evacuate. The National Weather Service will issue a hurricane watch when there is a threat of hurricane conditions within 24-36 hours to coastal areas.
   b. Learn about our community’s emergency plans, warning signals, evacuation routes, and locations of emergency shelters.
   c. Make a list of all prescription medicines and special medical needs equipment and supplies.
   d. Get refills as early as possible during hurricane season and/or as soon as you hear about a hurricane watch when there is a threat of hurricane conditions within 24-36 hours to coastal areas.
   e. Put together a “Family Go Kit” with a first aid kit and instruction manual, battery-powered tools, a first aid kit, fire extinguisher, sleeping bags, etc.
   f. Put together individual family member’s “Go-Kits” with blankets, pillows and personal hygiene supplies, such as soap, toothpaste, sanitary napkins, etc.
   g. Cover windows and doors with plywood or boards or place large strips of masking tape or adhesive tape on the windows to reduce the risk of breakage and flying glass.

2. **PREPARE FOR YOUR FAMILY**
   a. Inform local authorities about any special needs, i.e., elderly or bedridden people, or anyone with a disability.
   b. Locate (or buy) a fire extinguisher and make sure your family knows where to find it and how to use it.
   c. Set aside several clean containers for water, large enough for a 3-5-day supply of water (about five gallons for each person), and a 3 to 5-day supply of non-perishable food.
   d. Locate water-purifying supplies, such as chlorine or iodine tablets or unscented, ordinary baby supplies.
   e. Fill sinks and bathtubs with water as an extra supply for washing.
   f. Adjust the thermostat on refrigerators and freezers to the coolest possible temperature.
   g. Adjust the thermostat on refrigerators and freezers to the coolest possible temperature.
   h. Disinfect appliances to reduce the likelihood of electrical shock when power is restored.
   i. Secure any loose items which may damage property in a storm, such as bicycles, grills, propane tanks, etc.
   j. Adjust the thermostat on refrigerators and freezers to the coolest possible temperature.
   k. Cover windows and doors with plywood or boards or place large strips of masking tape or adhesive tape on the windows to reduce the risk of breakage and flying glass.

3. **PREPARE YOUR PETS**
   a. Secure your pets’ food and water bowls for the trip.
   b. Make arrangements ahead of time to board or move your animals to a safe place.
   c. Gather pets’ meds, food and favorite toys, locate their carriers, don’t forget food and water bowls for the trip.
   d. Plan your route out of town to follow designated evacuation routes and expect heavy traffic.

4. **PREPARE YOUR HOME**
   a. Fill your automobile’s gas tank. If you don’t have a car, make arrangements with friends, family or the City/public evacuation services for transportation.
   b. Have an emergency list for evacuating in your car with food, flares, booster cables, maps, tools, a first aid kit, fire extinguisher, sleeping bags, etc.
   c. Fill up with gas at least a day before leaving; fill up when a hurricane watch or warning is announced.
   d. Locate (or buy) a fire extinguisher and make sure your family knows where to find it and how to use it.
   e. Disconnect appliances to reduce the likelihood of electrical shock when power is restored.
   f. Be prepared to turn off electrical power when there is standing water, fallen power lines, gas and water supplies before you evacuate.
   g. Cover windows and doors with plywood or boards or place large strips of masking tape or adhesive tape on the windows to reduce the risk of breakage and flying glass.

5. **PREPARE YOUR CAR**
   a. Inform local authorities about any special needs, i.e., elderly or bedridden people, or anyone with a disability.
   b. Make arrangements ahead of time to board or move your animals to a safe place.
   c. Fill up with gas at least a day before leaving; fill up when a hurricane watch or warning is announced.
   d. Locate (or buy) a fire extinguisher and make sure your family knows where to find it and how to use it.
   e. Disconnect appliances to reduce the likelihood of electrical shock when power is restored.
   f. Be prepared to turn off electrical power when there is standing water, fallen power lines, gas and water supplies before you evacuate.
   g. Cover windows and doors with plywood or boards or place large strips of masking tape or adhesive tape on the windows to reduce the risk of breakage and flying glass.

If You Are NOT Ordered to Evacuate but to Shelter-In-Place:

The great majority of injuries during a hurricane are cuts caused by flying glass or other debris. To get through the storm in the safest possible manner, monitor the radio or television for weather conditions, if possible. Stay indoors until the authorities declare the storm is over. Be prepared to evacuate if the weather appears to have calmed—the calm “eye” of the storm can pass quickly, leaving you outside when strong winds resume. Bathrooms can provide some shelter if you cover yourself with plywood or other materials.

If You Are Ordered to Evacuate:

Because of the destructive power of a hurricane, you should never ignore an evacuation order. If a hurricane warning is issued for your area or you are directed by authorities to evacuate the area, take only essential items with you. Turn off gas, electricity, and water. Make sure your automobile’s emergency kit is ready.

---

**EVACTION Checklist**

- Driver’s License/Photo ID
- Social Security card
- Passport
- Birth Certificate
- Marriage License
- Title to car and registration
- Current utility bills
- Credit cards & Debit cards
- Children’s report cards
- Hotel reservation
- Phone listing (work, family, friends)
- Insurance papers
- Vaccination Record(s)
- List of current medications
- Medical and Prescription cards
- Current Lab results
- Approved medical conditions
- Medication bottles & Rexall
- Medical Equipment (sane, oxygen)
- Battery-operated Flashlight
- Battery-operated radio/TV
- First-aid kit
- Cash
- Snacks and non-perishable food
- Water
- Can opener
- Ice chest with ice
- Pet treats, Pet toys
- Pet ID tags
- Pet boarding facility at destination
- Pet food/water, feeding dish
- Pet treats, Pet toys
- Bed for pet
- Pet Collar
- Collar, harness, leash
- Current Veterinary Records
- List of Vet at evacuation destination
- Pet boarding facility at destination
